who we are...

DDS Demolition

www.dds-demolition.co.uk

Our innovative approach to demolition, alongside the continuous dedication of its workforce has created a reputable and reliable organisation, focused on customer satisfaction and improvement. DDS strives to fulfil customer requirements at every stage of the demolition process, providing complete project management irrespective of size, complexity or budget. Each contract is tailored to meet the needs of the client; a strategic and coherent solution will always be delivered within budget and on time.

Working with clients in both the private and the public sectors has led to the successful completion of contracts on sites within town/city centres, heavy industrial areas and marine projects.

DDS Demolition is part of the

...and what we do

Demolition

At DDS we understand that demolition is more than the removal of a structure, it is clearing the way for potential future development. The environmental implications on this have changed considerably over recent years and DDS Demolition remains at the forefront of the field, with strict risk assessment regimes, consistently high standards of training and up to the minute plant and equipment. This facilitates the optimisation of health and safety regulations as well as increasing the potential for recycling at every stage of the contract.

Site Clearance

With over 30 years of experience DDS have the knowledge and resources to undertake every type of industrial and commercial site clearance.

Reclamation

DDS Demolition operates an in-house reclamation depot. Pre-Demolition analysis outlines every material that can be salvaged, this methodical approach minimises possible wastage of reclaimable materials, enabling the company to pass competitive pricings onto the client.

Strip Out Works

It is not always necessary to totally demolish all structures; DDS can provide preparation works for renovation projects, supplying total service from simple removal of fixtures and fittings to the design and removal of complex structural elements.

Asbestos

The company's workforce are fully qualified, expertly trained and completely understand their significant responsibilities when managing asbestos. Our complete asbestos management package meets clients every requirements, whilst remaining safety and environmentally conscious.

Health and Safety

At DDS Demolition we are one hundred percent dedicated to safety, both internally and out on project locations. Regular Health and Safety audits are carried out by our safety officer and we have obtained and are fully compliant to the OHSAS 18001 accreditation for Health and Safety.

Training

DDS Demolition understands that quality training generates quality service and it is this training excellence that underpins DDS's unrivalled reputation. Our employee training scheme is ongoing and tailored to the individual.

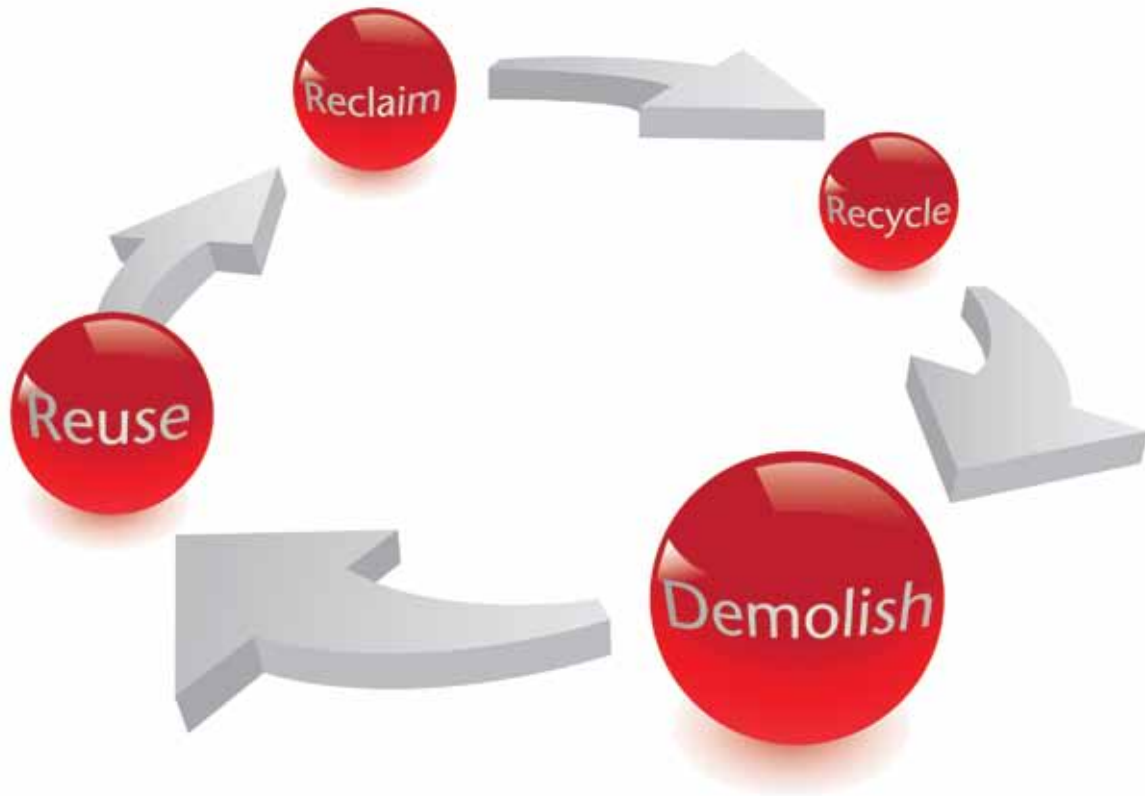

Equal Opportunities

Equal Opportunities apply to DDS in its entirety, every employee works within an environment conducive to the complete fulfilment of their potential within the company, and each member of staff is encouraged to be proactive against all forms of discrimination.

Environmental

DDS Ltd forms part of the 1948 Group which also incorporates our waste management company TW Services.

DDS understand the importance of environmental welfare and strive to maximise recycling, whilst minimising polluting emissions to air, land and water as well as decreasing the use of polluting transport. Alongside conserving raw materials, recycling preserves water and energy, and diminishes the production of greenhouse emissions and other pollutants.

A pre-demolition appraisal ascertains how much of the material can be reused, reclaimed or recycled.

All materials are accounted for; therefore there is minimal unnecessary wastage. Any reclaimed materials are transferred to our in house reclamation depot, other materials that can be processed and reused, such as recycled aggregates, are left on-site for use in any further development projects. All other materials are sent for further recycling at our waste recycling facility, TW Services.

These processes minimise the amount of waste taken to landfill sites, this in turn reduces the impact on environmental welfare to the surrounding areas. DDS Demolition has obtained and is fully compliant to the OHSAS 14001 standard.
